## Calculation of orders most easily

# 3

The **PDC-MANAGER** enables the complete evaluation of all order and workflow times with or without relation to the staff, order, and work flow times as well as the number of items and cost centers, when required, will be recorded and evaluated by the time and attendance control unit.

# R

**Actual times, working plan, follow-up calculation**

A work plan (process schedule) will be set up for every unit or each order. A target time can be indicated for every working unit. The follow-up calculation compares the actual times with the target times.

Production, material, and additional costs will be calculated for every order. These will be compared with the order value.

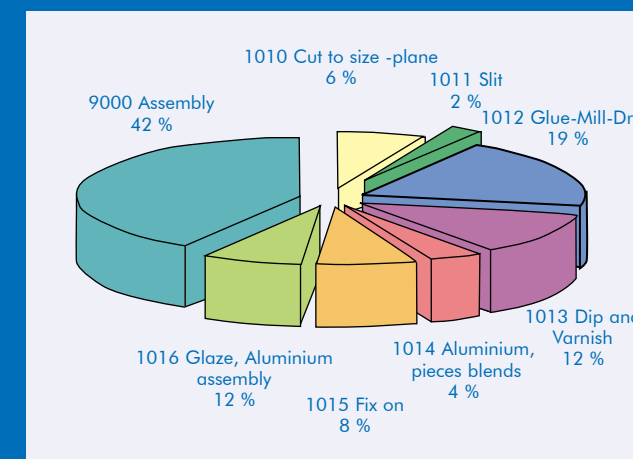

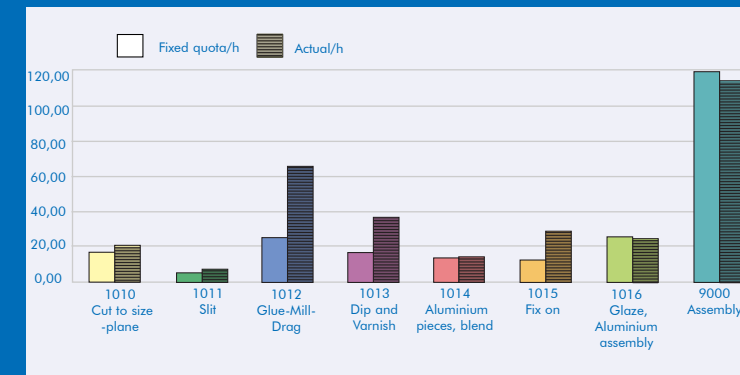

## Modular and individual

# S

The **PDC-MANAGER** offers numerous advantages:

- Online indication
- State of production per unit
- Time control
- Easy capture by barcode
- Modular software packages
- Additional modules
  - Administration of components
  - Administration of orders (The making of offers, orders, delivery notes, and invoices)
- Capacity planning
