Activate performance reserves with PQplus

3

In future, too, industrial production will fundamentally determine the level of prosperity worldwide.

Companies that want to manufacture competitively in this area are forced to carry through basic amendments in all sectors of their organisation, because

- the maximum planning and the fine control of all operational processes
- clear distinguishing of ressorts including the division of labour with hierarchical structure, or
- instructive leadership (top down)

have become obsolete and are no longer forward-looking.

New frame conditions

- such as best informed, quality-conscious consumers, and
- new global competitors being able to work with low salaries and wages and having access to state-of-the-art technical knowledge

Demand for new strategies

Especially the small and middle-class enterprises find themselves confronted with great challenges. They have to cope with more and more complex development processes to be able to offer their products still at competitive prices. New paths have to be followed to meet with these requirements.

We have got employees world-wide at our disposal and can take advantage of all thinkable knowledge most actually!

The use and the development of these resources lead to economical success direct.

- How to employ the staff's potential most optimally?
- How to restore competitiveness although salaries and wages over here belong to the highest in the world?
- How to react successfully to the forthcoming globalization of all markets?

PQplus has got the answers.

PQplus

Modular software for modern PC networks
Integration of sales, production and personnel

R

PQplus solves the problem to actualize continuously increasing quantities of data most easily.

The contents of unit lists and working plans are tied to the prices achievable in the market. The personnel-intensive, repeated process of maintaining data can, thus, be disposed with. Increases in productivity are no longer expressed by amendments of given points of time but by the productivity quote PQ.

At the same time PQ represents an effective payment feature being available without any intensive time studies or determinations of given points of time.

You save your money twice with PQ:

- less administrative efforts
- more effectiveness resulting from motivation

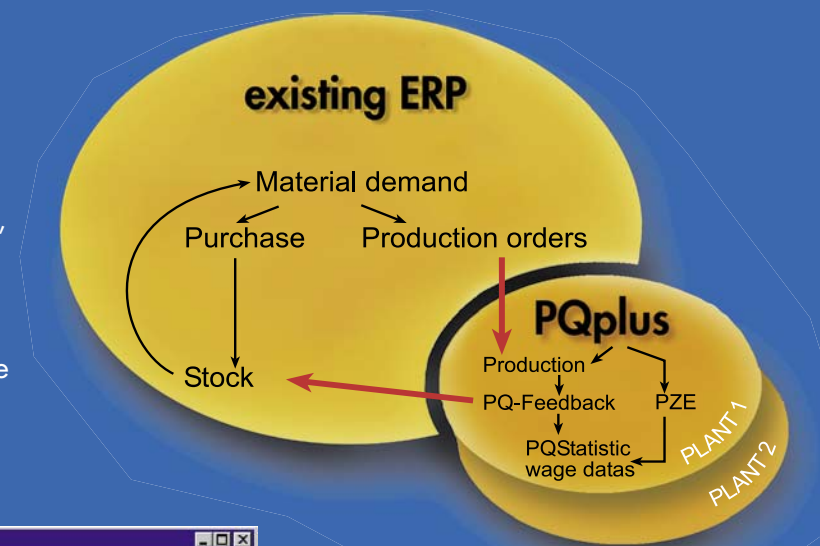

Decide yourself whether you wish to introduce PQplus as a complete program or step by step – module by module.

The PQplus system Integrated ERP

S

PQplus supports you in the capturing, persecuting, and invoicing of all operational orders.

From order to invoice all data are captured in a common data bank.
